ISACA EXPERTS ALL AROUND THE GLOBE

Founded in 1969, the Information Systems Audit and Control Association (ISACA) offers a global network of 140,000 professionals and deals with security, control, audit and management of information systems.

The umbrella organization consists of more than 200 chapters in over 80 countries worldwide. The ISACA Switzerland Chapter was founded in 1988 as an association and has about 1,500 members.

We impart knowledge and offer access to global research results and acknowledged standards. Our network is your network. We are committed to enhance your career opportunities. This is our mission.

CERTIFICATES FOR ADVANCED PROFESSIONALITY

Take a further step and boost your career or strengthen your position. ISACA certificates can open up doors for you.

Obtain Overview INFORMATION SYSTEMS AUDITING

Learn everything related to managing, monitoring and controlling IT and business systems. The internationally recognized CISA certificate distinguishes you as a qualified specialist.

Provide Security INFORMATION SECURITY

Enterprise information requires special protection. We provide you with the CISM certificate, and everyone will recognize you as an information security pro.

Lead Strategically IT ENTERPRISE GOVERNANCE

Systematic alignment of IT processes with a corporate strategy is what a CGEIT certificate qualifies you for. Professionalize your IT management in all fields of assurance.

Detect IT Risks RISK AND INFORMATION SYSTEMS CONTROL

Systematically detect, analyze, assess and control an information system's risks. With our CRISC certificate, you become a risk control expert.

KNOWLEDGE CREATES OPPORTUNITIES

IT GOVERNANCE WITH COBIT5

COBIT is a globally recognized business framework for governing and managing enterprise IT. It divides IT tasks into processes and control objectives. COBIT's approach is essentially applied on a top-down basis. Corporate objectives form the basis for the definition of IT objectives, which in turn influence the IT architecture. Suitably defined and operated IT processes ensure that information is processed, IT resources are managed and services delivered.

ISACA members get to download the framework as a reference for free and use it to derive their requirements. Members have free access to relevant information as well as expert knowledge, implementation tools and specific advice.

CYBERSECURITY NEXUS CSX

The CSX certificate courses «Cyber Security Fundamentals» and «Cyber Security Practitioner» introduce vital aspects of Cyber Security, highlighting the approaches and principles to conducting cyber security checks.

Participants also learn about assessment methods, the evaluation scheme, the objectives of action and the quality of an implementation.
